Our team conducting a sweep

What is TSCM

Technical Surveillance Counter Measures or "bug sweep" uses professional detection equipment in conjunction with detailed physical searched to detect radio frequency (RF) transmission to detect and locate electronic eavesdropping and illicit surveillance devices to protect your organization from information theft.

NAVMC Veteran Consulting deploys the most up to date spectrum analyzers to mitigate eavesdropping and illicit surveillance.

To protect your clients and their reputations we can detect:

- RF
- Ultrasonic
- Visible Light
- Infrared
- Wiretaps

Demonstrations available upon request

Subscription pricing available

To ensure that you and your guest privacy is ensured NAVMC Veteran Consulting Technicians have Technical Security Training Certificates from Research Electronics International (REI).

REI produces the highest quality US made TSCM equipment and is used by professional organizations, corporations and the federal government.

Who would want TSCM services?

Clients and guests that are expecting to have confidential communications that need to stay confidential.
